

INDIA SUSTAINABILITY STARTATHON 2023: WINNERS SPOTLIGHT

The team Chandrayaan 4.0 forged an indomitable team of five unique individuals - Lakshmi Priya, Bharath Kumar, Irum Fathima, Simone Fonseca and Rubina Darga from the School of Architecture, REVA University, launching their journey with the India Sustainability Startathon 2023. The boot camp conducted on the REVA University campus revealed the power of understanding problems deeply for better solutions, propelling them to triumph as one of the top 25 teams. This ignited their passion and determination to seize victory in the grand finale conducted on 22nd September 2023. Guided by the mentor, Mr. Palash Hase: a luminary in social entrepreneurship, marketing, and content creation, and enlightened by eye-opening sustainability master classes, their dream became a reality as they clinched first place in the India Sustainability Startathon 2023. Today, they stand ready to embrace fresh challenges and embark on the next journey at the global youth leadership summit in Singapore, driven by the belief that they can make a lasting impact for a better world, for the people.
