Why is a constitution important?

- A constitution is important because it ensures that those who make decisions on behalf of the public fairly represent public opinion.
- It also sets out the ways in which those who exercise power may be held accountable to the people they serve.
- And it sets out where government powers end by guaranteeing individuals' specific rights and freedoms. These rights help to assure the protection and promotion of human dignity, equality and liberty.
- Constitutions may provide for the division of powers between the central government and the regions.
- Constitutions should be agreed rather than imposed so as to provide an acceptable framework for the settling of different political views. They help provide for a stable society by ensuring that,
- although everybody may not agree with the government all the time, the people accept the legitimacy of the system of choosing governments.
