SCHOOL OF CIVIL ENGINEERING

Ph. D Course Work

This course work is designed for the research scholars who would like to peruse their Ph. D in seismic analysis of structures

Title: STRUCTURAL DYNAMICS AND TALL BUILDINGS
Guide and Co-guide (if any):
Scholar/s :

Pre requisites:

Structural analysis, Design of RCC structures and Design of Steel structures

Course objectives:

1. To familiarize the analysis of tall structures for incorporating research objectives
2. To know the behaviour of structures under dynamic loading and/or seismic loading
3. For the application of software analysis, to know the basics of Finite element method

Course outcomes:

At the end of the course, the research scholar will be able to implement his/her aims and objectives of the research to be carried out

UNIT-I

Analysis of building as total structural system considering overall integrity and major subsystem interaction, analysis for member forces, Stability of Tall Buildings: Overall buckling analysis of frames, wall frames, approximate methods, second order effects of gravity of loading, P-Delta analysis, simultaneous first order and P-Delta analysis, Transnational, Torsional instability

References mentioned in S. No 1 to S. No. 6 are to be studied for preparation

UNIT-II

The Response history and strong motion characteristics. Response Spectrum – elastic and inelastic response spectra, tripartite (D-V-A) response spectrum, use of response spectrum in earthquake resistant design. Computation of seismic forces in multistoried buildings Equivalent lateral force and dynamic analysis as per IS-1893

UNIT-III

Ductility and energy absorption in buildings. Concept of plan irregularities and vertical irregularities, Soft storey, Torsion in buildings. Confinement of concrete for ductility, design

of columns and beams for ductility, ductile detailing provisions as per IS-1893. Structural behavior, design and ductile detailing of shear walls

UNIT-IV

Basic Concepts of Finite Element Analysis, Steps in Finite Element Analysis- Displacement models, natural coordinates, one dimensional, Triangular, Rectangular Elements, construction of shape functions for 2 D truss, beam and rigid frame elements, Lagrangian interpolation, Lagrange and Serendipity Elements, assembly of stiffness matrices and load vectors by direct stiffness method, boundary conditions

References mentioned in S. No 16 to S. No. 23 are to be studied for preparation.

Doctoral Committee and its Constitution and Functions

8.1 There shall be **Doctoral Committee** comprising of the following:

- a.** The Guide and Co-guide if any, of the candidate.
- b.** Director / Head of the School concerned who is the chairperson of the committee.
- c.** Two Senior Faculty Members / Scientists of the concerned School who have expertise in the domain of the scholar.
- d.** One external member with the relevant expertise. The external expert should be from institute of repute and with good research credentials. Doctoral Committee for each candidate should be constituted by the internal guide with approval from BoS chair. The committee will conduct progress review biannually as per the convenience of panel and candidate approved by Director and Dean R & I. Council. The guide is responsible for convening the meeting and submitting the proceedings to the school within the time frame stipulated in the schedule sent from R&I council. The BoS chair shall submit the documents to R&I council.

Wherever possible, the BoS chair shall identify the core groups within the school considering the thrust area of research and accordingly assign the guides and scholars to these identified groups.

One external expert with the matching expertise in the identified core areas must be selected for every 3-4 scholars of that group and the review meetings be conducted for the scholars. There should not be more than one review meeting session per day involving the same external expert. The school should prepare the list of doctoral committee members for all the core groups.

8.2. Wherever Guide is also the Director / Head of the School of the University one more Senior Faculty Member / Scientist in the School shall be included in the Committee in place of the Director / Head of the School. In such Schools wherein the number of faculty members is less than two, members of the Doctoral Committee shall be chosen from sister School(s).

8.3. The Doctoral Committee shall have the following responsibilities:

- a.** To review the research proposal and finalize the topic of research.
- b.** To guide the research scholar to develop the study design and methodology of research and identify the course(s) that he/she may have to do.
- c.** To periodically review and assist in the progress of the research work of the research scholar.
- d.** To conduct pre-registration colloquium of the candidates.
- e.** To make possible suggestions, if any, regarding the progress of research work to the candidate through the research guide. All the suggestions and remarks on progress should be submitted to R&I council after the progress review meeting.
- f.** To conduct pre-thesis submission colloquium of the candidates.
- g.** To be part of open viva-voce of the candidates.
- h.** The same committee shall remain until the scholar submits the thesis.
